

"Windstar" Cruises to the Summit for Pro\$

As Ahlem Megatron Windstar-ET (Megatron x Legal) transitions from a US-based MACE evaluation to an official domestic proof, he becomes the highest newly proven sire this round. His success is particularly true for Pro\$ as he reaches the summit in #1 position while also having an impressive debut for LPI in #3 spot (#2 Fat, #3 Protein). Golden GDK Vivaldi stays solid at #2 Pro\$ and still dominates for LPI in #1 position (#6 Fat), with Hawarden Dimension Pilgrim-ET holding on at #2 LPI (#5 Pro\$, #3 Fat). Two other sires achieve Top 10 status for both indexes this August, including River Valley Cece Chrome-ET (#4 LPI, #9 Pro\$) and River Valley Pfennig Perfect Fit (tied #5 Protein), who now occupies #6 position for both LPI and Pro\$. The former Pro\$ leader, Sunset Canyon Megatron-ET, slips in ranking to #4 position (#11 LPI, #1 Fat, tied #1 Protein) and lands right behind his second proven son in Canada, namely River Valley PF MegaPower-ET (#3 Pro\$, #14 LPI, #4 Fat, tied #7 Protein). The Top 10 Pro\$ list is completed by Dutch Hollow Oliver-P at #7 Pro\$ (#13 LPI), Jars of Clay Barnabas at #8 Pro\$ (#16 LPI) and ERTL Mantra staying at #10 Pro\$ (tied #17 LPI, #10 Milk, tied #7 Protein). For LPI, several high ranking sires from April experience very little change, including Hawarden Impuls Premier (#5 LPI, #12 Pro\$), Sunset Canyon Dignitary-ET (#7 LPI, #28 Pro\$), Wilsonview IF Matt-ET (#8 LPI, #17 Pro\$) and Sunset Canyon Dazzler-ET (#10 LPI, #20 Pro\$). As the second highest newly proven sire this round, it is Covington Antonio-ET, who is the first proven son of Vivaldi (dam is Covington Zuma Della), that completes the Top LPI list as he grabs #9 position (#15 Pro\$). Another sire worth noting is Glynn Valentino Marcin (dam is Dutch Hollow Jevon Melinda 822-ET), who achieves official status only for production but becomes the new breed leader at #1 Milk and is tied with Megatron at #1 Protein.

For Jersey cows, Lencrest Cocopuff still leads both lists at #1 GLPI and #1 Pro\$ (#2 Fat) but four newly indexed cows join the Top 10 ranks for at least one of these indexes. The highest of these is JX Progenesis Jive Dahlia {6}-ET, who makes an impressive debut by grabbing the #2 position for both GLPI and Pro\$ (#9 Fat, tied #5 Protein). Guimo Nxlevel Irvana also has a great start with her first official index at #3 Pro\$ (#23 GLPI). Dahlia's maternal sister, JX Progenesis Imp Helene {6}-ET, also achieves Top 10 status for Pro\$ in #6 position (#16 GLPI, #6 Fat, tied with Dahlia at #5 Protein) while Reyla Jive Sharona ET does the same on the GLPI side, arriving tied in #9 spot (#13 Pro\$, tied #10 Protein). Alongside Cocopuff and Dahlia, three other cows earn Top 10 status for both indexes, namely Redhot Matt Tesla ET (#3 GLPI, #4 Pro\$, tied #1 Conformation), Progenesis Trillium (#4 GLPI, #5 Pro\$, #1 Fat) and Island Vivaldi Julie (#5 GLPI, #10 Pro\$). The Top 10 GLPI list also includes Lencrest Premier Coco ET (#6 GLPI, #19 Pro\$, dam of Cocopuff), Redhot Matt Nova ET (#7 GLPI, #16 Pro\$, tied #9 Conformation, full sister to Tesla), Guimo Zuma Julia ET (#8 GLPI, #44 Pro\$, dam of Island Vivaldi Julie) and Guimo Vivaldi Lysanne (tied #9 GLPI, #58 Pro\$). The three cows to complete the Top Pro\$ list this round are Summum Vivaldi Ira (#7 Pro\$, #12 GLPI), JX Ahlem Megatron Tracy 43605 {5} (#8 Pro\$, #11 GLPI, #3 Fat) and Reyla Barnabas Dolce Vita (#9 Pro\$, #25 Pro\$).
